

Curriculum Vitae

LARSSON KABUKOBA

Nationality: British

Email: larssonk22@gmail.com Mob: 07919 42 6665

Full Clean UK Driver's Licence

To whom it may concern,

I have almost 7 years experience working in industry as a web and app developer. During this period I have expanded my programming knowledge by learning a number of languages including Dart for Flutter, Java for Android, C#. I have worked independently and through entire project stacks; building, deploying and maintaining customer focused applications. I am self motivated, driven, adaptive and enjoy working as team.

Prior to my in industry roles I studied Computer Science at the University of Birmingham, freelanced as a web developer dealing mostly with Wordpress theme customisations and ran several of my own web based businesses. With the experience gained working in industry and freelancing I have familiarity working for various clients and within all stages of a project life cycle. I possess excellent communication skills with both clients and professionals. I am eager to continue my growth as a developer by learning new skills working alongside other professionals in motivated and talented teams. I aim to become a valuable asset to your company.

Previous Roles

Date	Employer	Industry	Role
2021 - 2022	Wise	On boarding	Software Engineer
2019 – 2021	Raytheon UK (Gloucester)	Cyber Security	Software Engineer
2015 – current	British Small Animal Association	Education	Web & App Developer
2008 – 2014	One Stop Clinics Ltd / Boundless Health	Healthcare	Management
2008 – current	KaijaWeb	Software	Freelance Web/Graphics Developer

Education and Qualifications

Date	Academic Institution	Qualification
2013 – 2015	University of Birmingham	Postgraduate Diploma in Computer Science with Merit
2003 – 2007	Oxford Brookes University	2:2 Bachelor of Arts (Hons) Architecture
1994 – 2003	Bishop Vesey Grammar School for Boys	3 A Levels, 11 GCSEs

Computing Skills & Experience

Applications	IntelliJ IDEA, Android Studio, Eclipse, Git, Microsoft Office, Microsoft SQL Server Management Studio, Photoshop, Postman, Visual Studio & VSC, Subversion, yEd, V-Ray, Xamarin, 3D Studio Max
Programming Languages & toolkits	Vuejs 2.0, TypeScript, ReactJS, C#, CSS, Dart, Flutter, HTML, Java, Java for Android, Java Springboot, Java Script, JSON, Libgdx, SQL,VB, XML.
Operating Systems	Linux Unix + bash, macOS Sierra, Microsoft Windows
Content Management Systems	DNN, Joomla, Wordpress
Search Engine Optimisation	On-page & off-page optimisation, Google AdWords, Google Analytics & Webmaster Tools.
Other Skills & Experience	Client management, Consulting, Mentoring, Requirements Management

Employment & Experience

Wise Ltd (Birmingham) 2021 – current

I have been in this role since September 2021 as an app developer working with Flutter. Wise has given me the opportunity to help develop and maintain a large scale on-boarding application that works alongside a custom CRM used by clients such as Amazon and DPD. At the time of writing my team and I working alongside the design team are rewriting the current mobile app with the aim to improve the user experience, modularise the code structure to make it easier to maintain and use Flutter industry standards such as MobX for state management, Provider and Navigator2.0 for routing within the app.

Responsibilities:

- ❖ Maintain the current Flutter app.
- ❖ Investigate and fix bugs affecting delivery drivers.
- ❖ Rebuild the app and implement new features.
- ❖ Write and manage assigned Jira tickets on our Sprint board.

Application	Description
https://play.google.com/store/apps/details?id=com.withwiseltd.app&hl=en_GB&gl=US https://apps.apple.com/gb/app/wise-mobile-app/id1559132570	Flutter: On-boarding app for self employed drivers working for companies such as Amazon and DDP. Once a driver has applied for a job with Amazon they are sent an access code to the app where they can register with us, track each stage of the on-boarding process from interview to job offer. Provide evidence of their eligibility to work, watch training material, sign up to special offers, view their invoices and calculate their taxes.

Raytheon UK (Gloucester) 2019 - 2021

I worked as a Software Engineer in Cyber Security for Raytheon. During this time I was security cleared (SC) and in the process of DV clearance. Due to the sensitive nature of the work I have had to sign NDAs so I am unable to discuss projects. My work had gained me recognition from my peers and leadership; I have received awards for my contributions to the organisation. The projects I have been a part of have given me the opportunity to learn and develop applications in VueJS, ReactJS, TypeScript, Java Springboot, Java Web Authentication and Amazon Web Services.

BSAVA (British Small Animal Association) 2015 – currently contracting.

Responsibilities:

- ❖ Develop Dot Net Nuke modules in C#, Android applications in Java.
- ❖ Improve upon the above apps and modules using staff and member feedback.
- ❖ Communicate with other departments and members in the development of applications.
- ❖ Debug and maintain sites and apps.
- ❖ Explore new technologies.

After graduating in Computer Science I was hired by the BSAVA as a web developer and the sole Android developer. It has been a challenge that I have relished and one that has helped me grow as a professional. My knowledge and responsibilities have expanded over the period that I have been with the organisation. Most recently I took it upon myself to research options to make our small development team more efficient. After prototyping using various IDEs including Xamarin I am now in the process of redeveloping and expanding our current apps namely the BSAVA App Suite and Congress App in Flutter.

Having now spent some time with Flutter I am comfortable enough with the toolkit to help others on StackOverflow and GitHub with their own Flutter applications.

One of the highlights of my time at the BSAVA was after a tender went out to firms to design and develop the new BSAVA website. However, after several weeks the winning firm failed to deliver and so I was called upon to build the site and deliver it on schedule. I am very proud to say that I managed to complete the site on time and saved the organisation 10s of thousands of pounds in the process; the charity's President and my peers have praised my work. I feel that I have been a great positive influence and integral part of the organisation's growth and continued success.

Please feel free to view and download applications I have worked on.

Application	Description
https://apps.apple.com/gb/app/bsava-app/id1474813642 https://play.google.com/store/apps/details?id=com.bsava.bsavaapp&hl=en_GB	Flutter: Membership and educational resource app for student vets and vet nurses many of which continue to use the application after they have completed their studies and are practicing professionally. App allows members ditch their plastic ID cards and use their phones instead, review their accounts and track there CPD with the association. They also have the ability to access e-books and databases of drugs and poisons.
https://www.bsava.com/pdp	C#: Personal Development Phase web module for DNN. Provides users with audio, video and text based resources, allows the user to track what material they have studied and save/print a certificate of proof. Google Analytics integration was added to track usage down to the user's membership level. The module also includes a backend system that allows the admin to add / edit / delete new resources from a database and export data into CSV spreadsheets.
BSAVA Poisons Database	C#: UI redesign for a member only DNN module that needed to be responsive and fit the new website design.
BSAVA Congress App	Java for Android: This is an event app that allows attendees to see what/where/when lectures, speakers, exhibitors and social event are. Users can rate the individual lectures, store notes and share their experiences on Twitter. In 2018 it trended #2 on the Google Play Store. Each year we take user feedback and improve on the app for the following year's Exhibition.
BSAVA App	Java for Android: this is an educational resource app for vets and vet nurses that has now been replaced by the newly built app made in Flutter.
https://www.bsava.com/	HTML, CSS and Java script, VB: I developed the website from the ground up, it runs on the DNN content management system.

Freelance Web and Graphics Designer, KaijaWeb.com, with over 60 projects, 2008 – Present.

Responsibilities:

- ❖ Planning projects and development from start to finish.
- ❖ Wordpress theme customisations.
- ❖ Requirement elicitation through client meetings and competition research.
- ❖ Managing hired programmers.
- ❖ Testing, deployment and maintenance of final product.

One Stop Clinics Healthcare Ltd & Boundless Health Ltd, 2008 - 2014.

Responsibilities:

- ❖ Day to day management.
- ❖ Scheduling clinics and Sonographers.

- ❖ Handling patients and prospective customers face to face and over the telephone.
- ❖ Design and maintenance of company websites.

Activities & Interests

- ❖ App development
- ❖ Researching new technologies
- ❖ Art & 3D visualisations
- ❖ Puzzle, multiplayer based FPS and driving video games.
- ❖ Martial Arts and combat sports
- ❖ Movie creation and analysis
- ❖ Listening to movie scores & contemporary classical music
- ❖ Super cars

Referees

Referees can be provided upon request.

Thank you for taking the time to read my CV.

Yours sincerely,
